Revolutionizing Transportation Impact Analysis: AI-Powered Innovations

Modeling Mobility Conference | September 16, 2025

Presented by Ayberk Kocatepe

What Can the TREDLite VMT Tool Do

**Regulate
Environmental
Impacts**

**Estimate
Greenhouse
Gas Emissions**

**Run Mitigation
Scenarios**

**Calculate
Internal Trip
Capture**

**Explore Data
Quickly and
Easily**

When To Use TREDLite VMT

TREDLite VMT can be used on a variety of projects:

Transportation Planning

Travel Demand Modeling

Site Selection

Land Development

**Traffic Analysis
and Engineering**

Carbon Reduction Programs

TREDLiteVMT

Analysis

Project Name: Bloomington Test

Location: Bloomington

Analysis Year: 2023

Project Land Use & Intensities:

Land Use	Quantity	Units	Per Capita/Employer VMT	VMT With Mitigation	Total VMT	Threshold	Significant Impact
221	200	Dwelling Unit(s)	21.7	21.7	12,738.8	12.0	Yes
Totals					12,738.8		

Total Emission Estimates:
For planning level only, not for use in CEQA air quality analysis.

Pollutant	Mobile	Mitigation	With Mitigation	Non Mobile	Total
CO (lb/day)	45.39	0.00	45.39	63.47	108.87
ROG (lb/day)	4.14	0.00	4.14	9.45	13.59
NOX (lb/day)	6.10	0.00	6.10	9.77	15.88
SOX (lb/day)	0.09	0.00	0.09	0.11	0.20
PM2.5 (lb/day)	2.18	0.00	2.18	2.55	4.73
PM10 (lb/day)	7.93	0.00	7.93	8.30	16.22
CO ₂ (mt/year)	1,362.99	0.00	1,362.99	2,452.74	3,815.73

Project Presumptions of Less than Significant Impact

☐ Within a 1/2 mile of Major Transit Stop

If your project result is higher than the threshold, we recommend clicking the Mitigate VMT button to learn and decide on ways to mitigate your transportation impact. Otherwise, click Print Results.

← Back Print Results → Mitigate VMT

Transportation Demand Management (TDM)

VMT can only be mitigated in each group by up to the stated Group Max Reduction. The current reduction listed for each group must not exceed the max reduction for its respective group.

[CAPCOA Handbook](#)

Selected Land Use: 710 - General Office Building

Total Maximum Reduction: 20%

Current Reduction: 0.00%

TDM Measure	Description	Max VMT Reduction	Input	Input Definition	Reduction
Land Use Strategies - Group Max Reduction: 20%, Current Reduction: 0.00%					
Trip Reduction Programs - Group Max Reduction: 20%, Current Reduction: 0.00%					

Parking or Road Pricing / Management - Group Max Reduction: 20%, Current Reduction: 0.00%

Provide Electric Vehicle Charging Infrastructure (T-14) Reminder: Does not reduce VMT	Install onsite electric vehicle chargers in an amount beyond what is required by the 2019 California Green Building Standards (CALGreen) at buildings with designated parking areas (e.g., commercial, educational, retail, multi-family).	11.90%	<input type="text" value="0"/> <input type="text" value="0"/> NA	number of chargers installed (e.g. 20) daily vehicles accessing the site (e.g. 200) project opening year	0.00%
Limit Residential Parking Supply (T-15)	This measure will reduce the total parking supply available at a residential project or site. Limiting the amount of parking available creates scarcity and adds additional time and inconvenience to trips made by private auto, thus disincentivizing driving as a mode of travel.		<input type="text" value="0"/> <input type="text" value="0"/> <input type="text" value="0"/>	required parking (e.g. 100) provided parking (e.g. 80) percentage of VMT generated by residents	0.00%
Unbundle Residential Parking Costs (T-16)	This measure will unbundle, or separate, a residential project's parking costs from property costs, requiring those who wish to purchase parking spaces to do	15.70%	<input type="text" value="\$ 0"/>	average annual parking cost per space	0.00%

HBW VMT/Employee

City of Monterey Threshold Project Project with Mitigation

Regional Average (HBW VMT/Emp): 22.3 Threshold (15% below Average): 18.9

Metric	Project	Mitigation	With Mitigation
HBW VMT/Emp	20.3	0.0	20.3
Daily Trips	468	0	0

Pollutant	Mobile	Mitigation	With Mitigation	Non Mobile	Total
CO (lb/day)	19.30	0.00	19.30	19.43	38.73
ROG (lb/day)	1.80	0.00	1.80	2.96	4.76
NOX (lb/day)	2.60	0.00	2.60	2.74	5.34
SOX (lb/day)	0.04	0.00	0.04	0.04	0.07
PM2.5 (lb/day)	0.92	0.00	0.92	0.93	1.85
PM10 (lb/day)	3.35	0.00	3.35	3.36	6.70
CO ₂ (mt/year)	458.64	0.00	458.64	846.74	1,305.39

Land Use Presumptions of Less than Significant Impact

☐ Affordable Housing

☐ Local Serving Land Use

TREDLite VMT's Key Challenges and AI Driven Solutions

Challenge

User Knowledge Gap

Significant Differences in user expertise make it difficult for all users to effectively navigate and utilize the tool

Regulatory Complexity

The complexity of laws and regulations adds to the difficulty of using the application efficiently

Reduced Productivity

Time-consuming navigation and information retrieval hinder user productivity and overall user experience

Solution

AI Assistant Integration

Implement an AI Assistant that helps users quickly identify relevant mitigation strategies

The New TREDLite VMT Experience

User Enters Project Info

Tool initializes baseline VMT analysis

- Site address
- Land use
- Project size
- Trip reduction strategies

AI Assistant Offers Guided Support

Instant access to definitions, thresholds, and workflow tips

- "What are your projects' transportation features?"

Smart Suggestions & Mitigation Support

AI reviews mitigation options by land use and location recommended in available documentation, and shares those insights with the user

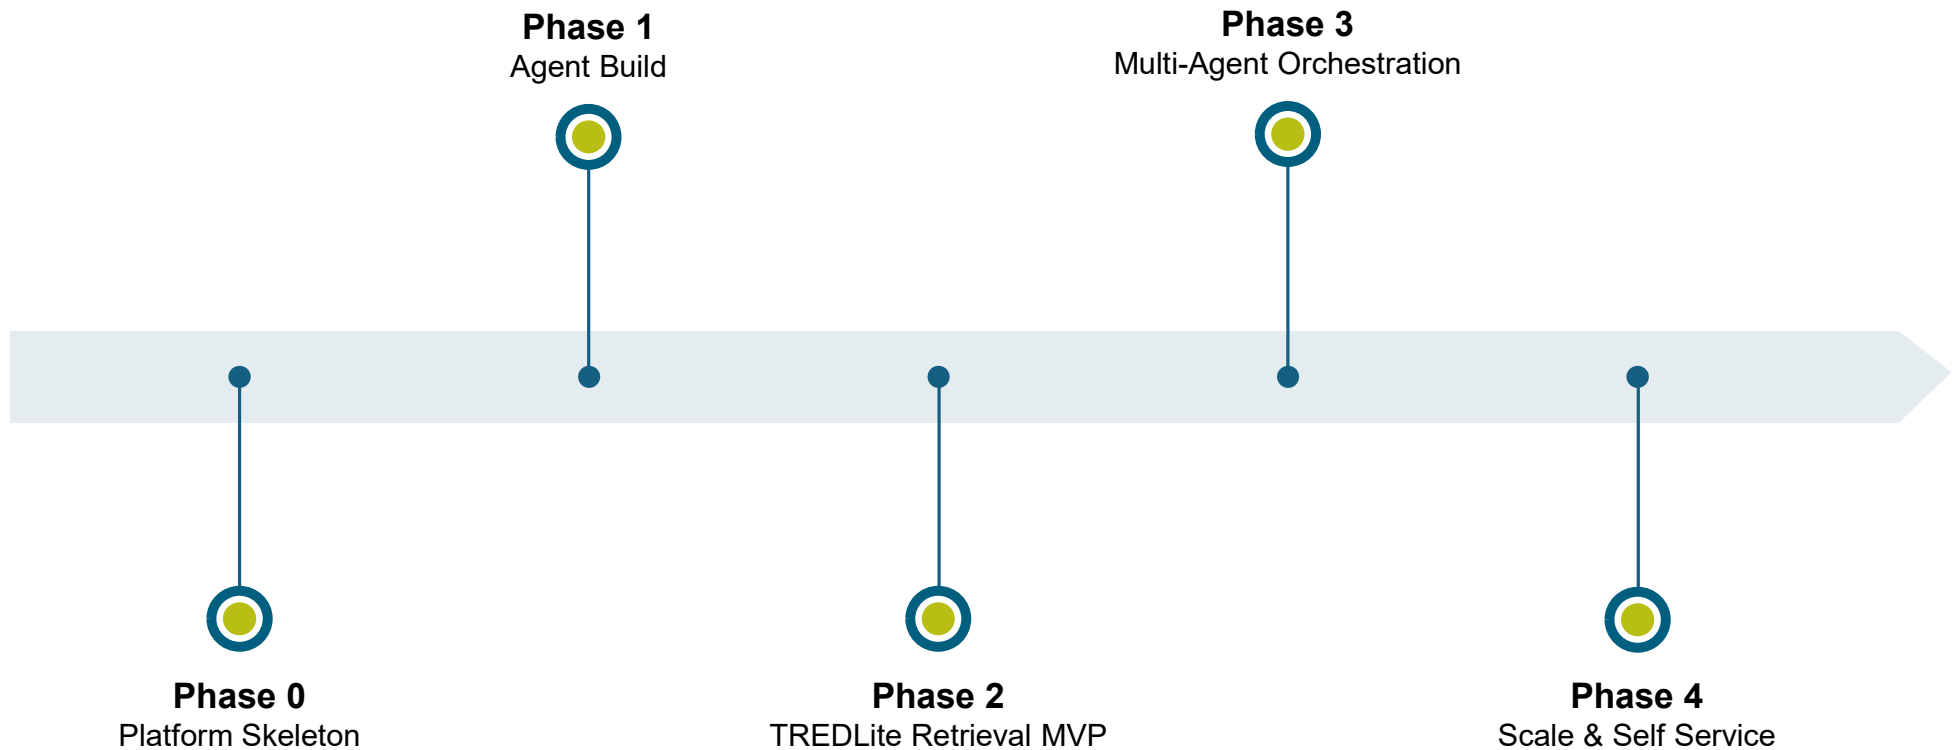

- Reduces trial-and-error and user uncertainty

Confidence & Efficiency Gains

- Faster project setup and review/completion
- Increased user satisfaction and decision confidence

Typical Roadmap

Key Learnings to Enhance AI Assistant Capabilities in TREDLite VMT

Data Foundation & Planning

Start small until
indexing meets the
requirements

PDFs vary (text vs
optical character
recognition/OCR
needed)

Test most complex
documents first

Quality Assurance & Validation

Human validation is
essential

AI responses can't be
trusted without
verification

Always cross-check
with source
documents

Model Selection & Architecture

Choose models by task
requirements

The newest/most
expensive model isn't
always best

Evaluate performance
vs cost

Prompt Engineering

Include golden
responses as reference
samples

Focus on specific,
measurable outcomes
vs general guidance

How We Applied Lessons Learned

Rebranding for Better Reception

Lesson: Use the term *AI Assistant* instead of *AI Chatbot*

Why it matters:

- Helps distance the tool from negative perceptions of chatbots
- Sets a more helpful and human-like tone for user interactions

Building Trust Through References

Lesson: Include references in every AI response

Why it matters:

- Add credibility and transparency to AI-generated answers
- Helps users trace information back to source documents

Navigate Uncertainty with Care

Lesson: Avoid giving answers when none exist

Why it matters:

- Acknowledges limitations while maintaining user trust
- Focus on guiding users when definitive answers aren't given
- Reinforces transparency and thoughtful communication

More Than Just an Assistant

Lesson: Highlight the assistant's ability to search internal databases

Why it matters:

- Demonstrates the assistant's power to extract insights from resources like CEQA and legislation

First Look at the TREDLite VMT AI Assistant

- Currently, content is not shared between the platform and the AI Assistant (AI assistant is optional)

 AI-assistant
Powered by TREDLite VMT

Hello! I'm your AI assistant!
With my help you can begin leveraging AI-assistant insights, powered by TREDLite VMT to help you work smarter.

To help us get started, please provide the following project details:
jurisdiction or parcel address, analysis year, and any ITE Land Use types.

What is CEQA?

What are TDMs?

What is SB 743?

What is VMT?

Write your prompt...

By submitting this comment you agree to the [Code of Conduct](#). AI-generated content. These results do not replace professional services. Please verify critical information.

Success Factors That Enable Key Differentiators

- ✓ Understand your data sources thoroughly
- ✓ Verify AI Search and Chat response functionality with ingested PDFs
- ✓ Cross-validate all AI responses against original documents
- ✓ Design to augment human decision-making, not replace it
- ✓ Measure business outcomes, not just technical metrics
